

In the Specification:

Please replace the ABSTRACT with the following amended abstract:

The invention concerns a device with a supervising unit (10) arranged to handle a rule system for the behavior of an entity-(44). The supervising unit (10) comprises at least one storage member (12) in which a set of rules (14) for the behavior is stored. The device also has a user interface (16) comprising ~~first means~~ (18) a presenter for presenting information, preferably concerning decisions which are made and/or recommended, to a user. The device is arranged with a first (41) and a second (42) rule handler which can work in parallel with each other. Said ~~first means~~ (18) The presenter can simultaneously present information concerning the rule handling which is carried out by the first rule handler (41) and the rule handling which is carried out by the second rule handler (42). The invention also concerns a use, a system comprising a device according to the invention as well as storage media with computer programs for implementing the invention.
